COLOURS AVAILABLE FOR STANDARD RUBBER TILES

EXCELLENT COLOUR SELECTION FOR RUBBER TILES

Impact-resistant standard rubber tiles are designed for gyms and fitness centers. This is designed to reduce the impact of heavy free weights and is installed in free-weight zones

Impact tiles provide outstanding sound and vibration insulation, ensuring that the gym is silent beneath, around, and above.

With its superior interlocking hot moulding technology, Interlocking Rubber Tiles are of premium quality.

Interlocking Rubber Tiles are environmentally friendly and completely reversible, allowing you to quickly create a safe, comfortable, and protective rubber safety floor covering.

Interlocking rubber tiles ensure that seams are virtually undetectable. This results in a uniform appearance on your floors. Rubber interlocking tiles can be easily installed over nearly any smooth surface, including concrete, pavement, carpet, hard wood, or tile. There have been no special tools required.

They are available in puzzle-style pieces that fit securely together, similar to jigsaw puzzles. The unique tab design securely tightens the tiles together without the use of expensive adhesives, tapes, or the guidance of a fitter.

Aligning the tabs and pressing them together with your fingers or a rubber mallet is all that is required for installation. The unique tab design enables installation in a rectangular or cinder block pattern.

Additionally, all such interlocking rubber floor tiles can be disassembled and reassembled without damaging. Our products are developed in accordance with ASTM and EN standards, including the most recent revisions.

Easy to install rubber flooring in our few lightning fast steps you can have your surface fully installed in minutes or less
